Softly Anti-Oxidating CORPUS PARADOXE BODY OIL Chilean GSPE/Procyanidin Anti-Age Concentrate

Beauté Pacifique Corpus Paradoxe Body Oil is developed to provide significant Anti-Age treatment combined with a pleasant feeling of pampering.

Corpus Paradoxe Body Oil penetrates quickly and after just a few minutes the skin is ready for the day - or well prepared for a skin-type suitable Beauté Pacifique Body Lotion.

In addition to the immediate sensation of softness and freshness, the powerful Anti-Age effect gives the cells a remarkable protection due to two highly active ingredients Resveratrol and Procyanidin – two substances reported in the medical science to provide life extension to cells.

These ingredients are found in high concentrations in grapes grown on hillsides in the Chilean Andes Mountains where UV-radiation is especially strong. Through evolution and “survival of the fittest”, these grapes have developed an efficient protection system, based on Resveratrol and Procyanidin, against the UV-radiation.

In Corpus Paradoxe Body Oil we exploit the high concentrations of Resveratrol and Procyanidin in Chilean Grape Seed Extract (GSPE) to copy this protective and lifetime extending system into human skin.

The GSPE-extract is mixed into skin-compatible Squalane oil, which functions both as a transporter of the GSPE into the full depth of the skin and to replace natural Squalane lost due to sun-damage and aging.

Furthermore the Corpus Paradoxe Body Oil contains two types of Vitamin E to provide even more anti-oxidative Anti-Age effect. And in order to emphasize the feeling of luxury, the pleasant fragrance known from Beauté Pacifique Body Lotion is added.

CORPUS PARADOXE BODY OIL

Anti-Age Body Oil

Unique benefits

- Near medical Anti-Age effect
- Provides cellular defense against aggressive free radicals
- Leaves the skin silky soft
- Contains two types of Vitamin E
- Reduces pigmentation

Main ingredients

1. Squalane is an oil naturally occurring in human skin and is an important part of the lipid system. Its penetration capacity is remarkably high. Young and healthy skin contains a high amount of squalane but the level will decrease dramatically with age. Therefore squalane is absorbed excellently into sun damaged and aged skin. A lack of squalane within the skin can lead to premature aging, very dry skin and a loss of elasticity. Areas of constantly exposed, dry and prematurely aged skin become incredibly soft immediately when squalane is applied in the right formulation.

2. Vitis Vinifera/ Grape Seed Oil (This special Chilean oil contains a very high amount of Resveratrol and a significant amount of Procyandin). Comprehensive medical documentation proves that both Resveratrol and Procyandin can delay aging and prolong the cells' lifespan – and therefore this product keeps the skin young and healthy for a longer time.

3. Tocopheryl Acetate and **Tocopherol** are two types of Vitamin E that plays an important role by protecting both the skin and the product against harmful free radicals.

Ingredients

1. Squalane
2. Vitis vinifera / Grape Seed Oil
3. Tocopheryl Acetate
4. Tocopherol
5. Parfum/ Fragrance

Complementary Products

- Bade Gel
- Body Scrub
- Body Lotion

Other GSPE Products in the Range

- Submersive Serum Paradoxe
- Scars & Stripes
- Crème Paradoxe
